Second Grade News

Curriculum Corner

Reading
It has been a busy first few weeks in Reading! Students are working on their reading “stamina” and choosing just right books. Classrooms have begun discussing expectations for reading stations and are slowly implementing each station into their routine. We are really focusing on reading our entire just right book and not giving up too easily. Teachers have also begun assessing each student at their current level in reading.

Math
In math we have been working hard on our fact power (addition facts). We have also been learning many new math games to help us with these addition facts. We will continue to work on our addition facts next week. Students have also begun 2nd grade ST math. Students are welcome to try ST math at home as well!

Homework in 2nd Grade
Second Grade teachers have decided on a reading log for homework this year. We are expecting students to read for at least 20 minutes a night and record their book in the space provided. A new reading log will come home each Friday and is due back to your child’s classroom teacher by the following Thursday. Please let us know if you have any questions!
