Thank you for all of your support the first week of school! Next week we will transition to our regular learning routines and begin core subjects. It will be important for students to check their Schoology folders daily for assignments.

Principal Pen:

Dear Ridgeway Families,

Whether you are a new or a returning family – the RAP is an email to read! This weekly newsletter will have news from the office, teacher and unit updates, and other things going on at Ridgeway.

If you are a new parent to elementary school, you might be thinking, “Is this what it always feels like?” The answer is . . . no, not really. This is school in a pandemic. No matter the learning format, we are excited to be back to school and learning. Our teachers have spent this first week developing relationships with students and introducing them to the technology and supplies available. Next week, that will continue and you will see lessons and learning build. Please read the five tips for zoom that I included in another box in this RAP. Watch next week for five more tips.

WELCOME and welcome back to our Ridgeway learning community. Please reach out to me with questions and comments!

Supporting your child with Zoom

(5 tips to make virtual learning experiences successful for your child.)

• Help your student plan ahead to fully charge their device before entering the Zoom classroom.
• Help your student enter the meeting at the correct time. Many teachers have worked with students to set timers. Instruction and directions begin promptly.
• Encourage your child to participate, take turns, and listen to others away from other distractions.
• If your child needs to leave the meeting early or will not be attending because of an appointment, be sure to let your teacher know.
• Please do not use photography or recording during Zoom meetings.
FREE VIRTUAL TUTORING

WHO ARE WE?
AWWWN is a team of University of Missouri Graduate and Undergraduate students trained in providing individual academic supports to students.

SERVICES WE PROVIDE
AWWWN provides free tutoring services to K-8 students in the areas of reading and math, including homework help and evidence-based literacy interventions. For the health and safety of our staff and the families we serve, our program is completely virtual for Fall 2020.
