If you need help reading the papers your student brought home, you can use Google Translate on your phone.

**Translate what you see through your camera**

For some languages, you can translate text by pointing your phone’s camera lens. Translations of small, badly lit, or stylized text could be less accurate.

1. On your Android, iPhone or tablet, open the Translate app 📦.
2. If needed, pick the languages.
   1. At the top left, choose Detect language or the language you want to translate.
   2. At the top right, choose a language you read.
3. Tap Camera 📸.
4. If needed, tap Instant 📈.
5. Point your camera at the text you want to translate.

Note: If needed, you can tap Pause translation or Continue translation.
