Blowing Bubbles

How do we do it?

1. Pour the detergent, water, and syrup or glycerin into the large container. Stir gently without creating suds.
2. Gently blow through wands. Enjoy!

What Do We Need?
- ¼ cup dishwashing detergent (Joy and Dawn work best)
- 8 cups water
- 1 tablespoon corn syrup or glycerin
- Spoon
- Large plastic container or bucket with lid
- Bubble wand

Safety Tip
Bubble solution is slippery.

What’s in it for us?
- Blowing bubbles helps your child develop the muscles she needs for clear speech.
- Your child is a scientist as she discovers how hard to blow and how hard to wave different wands to create bubbles.
