

COLUMBIA SCHOOL DISTRICT
Award Result

RFP NO. 14/63
Next Generation IP-Based Voice Communication System
February 14, 2014

Overview

The request for proposal is to acquire a telecommunications system that will replace the current NEC, Spherically infrastructure and is capable of meeting anticipated growth. Columbia Public Schools requires a system that provides Unified Communications capabilities, role based administration, single number reach, ease of use, scalability and reliable maintenance. Ultimately, Columbia Public Schools intends to leverage modern technology to improve the overall telephony environment and experience. This upgrade will include many features that are currently not available including mobility, cell phone twinning, video/audio conferencing and active directory integration.
