The Columbia Grand Teton/Yellowstone Adventure is a summer trip developed for students in Columbia Public Schools. The 2019 science adventure took 700 enthusiastic students and staff to Wyoming for this great adventure. The trip allows students the opportunity to explore the natural world in one of the most biologically diverse and geologically special areas in the United States and planet Earth. Students will learn about mountain and glacial geology, wildlife tracking, forest fires, Yellowstone ecosystems, leadership, and outdoor skills. All trips are a full week.

Teton Science Schools have been bringing groups to the wonder and knowledge that is the Greater Yellowstone Ecosystem since 1967. The campus features dormitory-style accommodations, meals prepared by staff, and most importantly, daily activities and adventures lead by Science School staff members. Students will explore a new area of the park every day in groups of 11-12, guided by accomplished field instructors.

Total Price: $815 Includes meals, lodging, transportation, and t-shirts!
